HGC BDX triumphs in 2016 Global Telecoms Business (GTB) Innovation Awards

HGC, in conjunction with Huawei International Co. Limited - has won the Business Service Innovation category of the 2016 GTB Innovation Awards in recognition of Big Data Exchange (BDX) service.

A content-exchange platform designed for OTT players such as content providers, game developers and application providers, BDX extends beyond traditional hosting and colocation by providing 24/7 one-stop technical support. It covers areas seldom addressed by telecoms operators, such as soft/hardware configuration and OS tweaking. Customers can opt for services based on need, so they can turn capex into more affordable opex.

HGC wins Best Performance Award (RFO) at NTT Communication Arcstar Carrier Forum 2016

HGC wins Best Performance Award (RFO) at NTT Communication Arcstar Carrier Forum 2016. HGC was awarded the Best Performance Award (RFO Delivery) at the NTT Communications Corporation (NTTCom) Arcstar Carrier Forum (ACF). RFO refers to Reason for Outage. NTTCom considers HGC the best carrier among its service providers who delivered most successful RFO during January – December 2015.

In particular, by being able to collect RFO not only from its operations but also from local vendors, highlights HGC's commitment in providing customers total network quality and assurance. The award testifies that HGC fully understands NTTCom's requirements and continues to deliver high-quality services that meet and exceed expectations.

NTTCom's Ms. Megumi Yamamura, Chairperson at ACF2016 said: "HGC was chosen from all carriers providing services to NTTCom based on our stringent judging criteria, making HGC the real number one and the crème de la crème. We are very impressed with HGC's proactive approach in increasing service quality and its excellent post-sales support such as detailed reports and even improvement plans that are rarely provided by other carriers, ensuing us peace-of-mind."

Since 2000, NTTCom has, together with its allies around the world who embrace the Arcstar network management strategy, hosted ACF. Focusing on continuous improvement, NTTCom sets the most important KPI criteria each year in terms of global network service layout, formulation, operation and maintenance and rewards companies with outstanding performances and quality improvement achievements.

HGC receives AMS-IX's Silver Partner status

Amsterdam Internet Exchange (AMS-IX) has awarded HGC with Silver Partner status for its help in facilitating the growth of AMS-IX's Internet Exchange.

As a certified Partner of AMS-IX, HGC is able to offer its customers remote connectivity to AMS-IX in Amsterdam and provide them with increased peering benefits.
