

# HGC-VPN Service

Business connectivity with full feature set and redundancy

HGC-VPN service keeps you connected to offices, business partners and customers around the world via bandwidth that ranges from 64kbps to 100Mbps. Based on our global MPLS network, a four-tier service structure and world-leading telecommunications infrastructure, this solution offers one-stop-shop advantages to meet all your needs. HGC-VPN also benefits from a wealth of HGC experience and expertise, as well as connections with top-tier partners the world over.

## Features

- Different classes of service (CoS)

- MPLS-based core network

- Different types of local loop

- Managed CPE service

- Integrated voice solution

- Internet breakout

- High-availability solutions

- Total solution customisation

## Benefits

- Platinum for voice traffic, Gold for multimedia traffic, Silver for business-critical data and Bronze for general data / internet traffic
- Customised combination of CoS for specific needs and applications

- Link multiple sites with a fully-redundant network

- n x 64kbps, E1, DS3 circuits supported
- Fast Ethernet and Gigabit Ethernet circuits supported

- 24/7 full OAM of customer-end routers
- Web portal enabling customers to review CPE and network performance at each site

- Office-to-office calls and outbound international calls using VoIP technology

- Via HGC reliable IP network for Internet access

- Dual MPLS links
- MPLS primary link with IPSec backup link
- IPLC with MPLS integrated solution

- IPSec with leased line or DSL solution
- SSL remote access solution
- Network security solution
- WAN optimisation
