COMMUNICATIONS

**CAST YOUR VOTE NOW!**

Andrew Kwok  
Chief Executive Officer  
HGC Global Communications

**CEO of the Year**  
TELECOM ASIA AWARDS 2019

## **Cast your vote in the CEO of the Year of Telecom Asia Awards 2019**

After becoming the portfolio company of I Squared Capital since October 2017, the new HGC has been further strengthening the position as the full-fledged and leading fixed-line operator in Hong Kong and overseas. In recognition of what HGC has accomplished in 2018, we are pleased to inform that our CEO, Andrew Kwok has been nominated for the CEO of the Year in Telecom Asia Awards this year. Thanks to the collaborative effort, support and contribution from our partners, customers, investors, stakeholders, and more importantly from our colleagues. Without any of them, we may not be able to conquer the challenges that we have tackled as well as what we are going to face.

Under Andrew's leadership, various parties have been coming in for collaboration and partnership in different areas and we are reaching out to them as well, which have brought a vast amount of business opportunities and a huge success to HGC. In the future, we will continue to invest in infrastructure in Hong Kong, as its global base of operations, while expanding internationally. This involves replicating the knowledge, business model and success in Hong Kong in parts of the world where it sees opportunity. Simply, we will keep moving forward.

You may now show your support to us and cast the vote at the [link here](#). (Deadline: 18 April 2019)  
You are also welcomed to circulate the link to your professional network for voting.

*(Note: Everyone can vote once only, and employees of the shortlisted companies/nominees will not be counted)*  
For details of the Telecom Asia Awards 2019, please refer to [here](#).

Again, thank you for being with us in the journey, it wouldn't be the same without any of you.

**HGC NEXT-GENERATION  
MARKETPLACE**

## **HGC launches next-generation Telco-Services Marketplace by SDN**

HGC's SDN technology marketplace creates customer centric services covering:

1. Global connectivity on Ethernet layer to other major carrier hubs, data centre to data centre worldwide
2. All HGC flagship Big Data Exchange (BDX) data centres will be connected enabling customers to order private cloud services, colocation and other value-added one-stop services.
3. Seamless connection to Global Internet Exchange will be enabled via the SDN infrastructure, starting with AMS-IX Hong Kong, and expanding to Europe and US-based Internet Exchange to meet the needs of Asian ISPs and OTTs.

We invite you to join us and continue to enrich our marketplace ecosystem!

## **HGC CDO Shares about application of SDN in Healthcare and Retail**

The evidence of dramatic change, brought about by the fourth industrial revolution is all around us and it's happening at exponential speed. With this, comes the growing need for comprehensive, always-on, and uncompromised connectivity, underpinned by software defined ("SDN") enabled digital infrastructure.

Enterprises of all sizes and industries are utilizing SDN as a way to accelerate their operational agility and intelligence, while reducing complexity.

## HGC CDO shares about Ethics of AI

Digital transformation, along with continuous advances in technologies such as AI, IoT, data analytics, big data exchange have given rise to a trend in building more complex IT systems.

"The complexity of software often means that it is not possible to work out exactly why AI does what it does. Actionable ethical principles need to consider how AI is used in a particular context. The ethical issues involved in autonomous weapons, for instance, are very different from the ethical issues involved in the use of AI for recidivism scores or employment screening."

## **Celebrating A Significant Year for HGC China Team**

---

2018 is a year of significant change to our China team in terms of company strategy, business direction and market environment. In face of the rapid changes, China team demonstrated team cohesion and dedication into expanding key business, e.g. OTT, BDX Data Centre, enterprise and wholesale market.

To celebrate the successful year and continue to aim high for 2019, sales, marketing, product expertise from Beijing, Shanghai, Guangzhou, gathered and enjoyed the fun time. We continue to create another exciting year elevating the accomplishment for our customers and partners as a team!
